

» ART 230

230V ac Radio receiver with single channel transmitter to control a single actuator or single bank of actuators simultaneously. Can also be used with the PS24 Transformer Unit to operate 24V dc actuators (type of PS24 dependent on number of actuators).

» RRT KEY 2

2 Channel Radio Transmitter to use with the RRT Unit to individually operate 2 actuators or 2 banks of actuators from a single key fob.

» RRT KEY 12

12 Channel Radio Transmitter to use with RRT Unit to individually operate up to 12 actuators or 12 banks of actuators from a single key fob.
